

PUTT PUTT FUN HOUSE WEBSTER, TEXAS

To keep current with technology and to help promote repeat customer visits, Putt Putt Fun House is continuously looking for new and exciting attractions. "Centrally located in our new FunHouse Cafe, and as the focal point and key attraction, is the Lightspace Play floor" says Jim Saxe, owner of Putt Putt Fun House. "The Lightspace Play floor is the perfect interactive attraction appealing to both kids and adults alike".

Located in Webster, Texas, Putt Putt Fun House is a Family Entertainment Center that has been in business for the past 28 years. The location caters to all ages and provides the perfect location for both children's birthday parties as well as corporate events. Putt Putt Fun House has seen increasing success and continues to add new attractions to their already proven business model with pieces such as laser tag, bowling, and mini golf.

"I invested in the Lightspace Play system to stay current with the hottest and latest games and technologies that are available today" says Saxe. "It has surpassed my expectations to increase the amount of money the younger and older children spend within my location." The Play system is used with a coin-op game cabinet control system accepting the tokens used within the facility. Depending on the event or function, the owner and operators are able to switch the system from pay-for-play to a free-play system for a period of time. "I never imagined having a system like Lightspace Play would increase my revenues for birthday parties and corporate events. With an average of 50 birthday parties per weekend, the Lightspace Play floor is seeing a lot of action."

"Lightspace has enabled Putt-Putt Fun House to set itself apart from its competitors by providing a unique fun product that all ages are able to enjoy. I am happy about my decision to invest with the Lightspace Play system."
